Petroleum Production OEC

Community and Technical College

Anchorage KOD KPC MSC PWSC

Enter assessment coordinator name, title, email address.

Outcome# 1 (: Desc * 3 total
student exams, 100% B or better. Results exceeded faculty expectations.

Outcome # 2 (Describe the operation of various types of oil & gas well production methods.): Asses
one class, total student exams 89% B or better. Results exceeded faculty expectations.

Outcome #3 (Identify federal agencies, state agencies, and their applicable regulations that imp
safety, health, and environment concerns in petroleum production operations.): Assessed

Nothing at this time.

1.) While I agree that the assessments show that the students are meeting or exceeding the expectations, it should be noted that there are other areas that might help with student success. In this case, I would look at ways to improve access to the program to a wider range of students while maintaining the excellent rigor within the program. I recommend that an analysis could provide you knowledge about where some of these issues could lie.

2.) It is clear that the program is in line with student and industry requirements. Based on the annual assessment of the program, all of the assessments meet expectations. However, 3 of the assessments exceed the student learning outcomes. The faculty should be commended on their focus on meeting the student needs and making sure they are ready for entry into the oil and gas industry.
